DETAILED ACTION

Response to Arguments

Applicant's certified English translation has been entered, therefore the 103(a) rejection has been withdrawn, however a new ground of rejection has been presented.

Allowable Subject Matter

Claims 6, 7, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the radiation-sensitive polysiloxane composition comprises components (a) and (b), and has a silanol (Si-OH) group content of from 10 to 50 percent based on the total bonds on Si: (a) at least one type of compound selected from the group consisting of hydrolysates of hydrolyzable silane compounds represented by formula (1) and condensation products of said hydrolysates,

$$(R^1)_p(R^2)_q Si(X)_{4-p-q}$$
 (1)

wherein R1 is a non-hydrolyzable organic group having 1 to 12 carbon atoms and at least one fluorine atoms; R2 is a non-hydrolyzable organic group having 1 to 12 carbon atoms and no fluorine atoms; X is a hydrolyzable group; p is 1 or 2; and q is 0 or 1; and (b) a photo-acid generator. Claims 10 and 11 are allowable based solely on the allowable subject matter of claims 6 and 7, respectively.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4, 5, 8, 9 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Tamaki (U.S. PG Pub. # 20078/0014518 A1).

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

In Re claims 4, and 12, '518 teaches a method for manufacturing an optical waveguide chip having an optical waveguide and an optical fiber guide portion for positioning an optical fiber to be connected with the optical waveguide, which method comprises: (A) a step for forming an optical waveguide using a radiation-sensitive polysiloxane composition; and (B) a step for forming an optical fiber guide portion using the same or a different radiation-sensitive composition as/from the material of the optical waveguide (par. 0083, par. 0105, and par. 0128).

Application/Control Number: 10/591,913 Page 4

Art Unit: 2874

In Re claim 5, '518 teaches a step for fixing a cover member on the upper surface of the

optical waveguide formed in step (A) (par. 0132).

In Re claims 8 and 9, '518 teaches wherein the optical fiber guide portion comprises a

pair of molded products which are formed to have a suitable distance from the optical waveguide

and which are apart from each other (fig. 4, item 17).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Chad H. Smith whose telephone number is (571) 270-1294. The

examiner can normally be reached on Monday-Thursday 7:30a.m. - 5:00p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Rodney Bovernick can be reached on 571-270-2344. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.
